PRELIMINARY AMENDMENT (REVISED)

Sir,

Please amend the claim 57 to remove the redundant PapMV language. In accordance with 37 CFR 1.121 a Claim Listing is included and the status of each claim is indicated according to the seven permissible status identifiers, i.e. (Original), (Currently amended), (Cancelled), (Previously presented), (New), (Not entered), (Withdrawn). Amended claims use brackets for additions and strike-through for deletions.

Responsive to Examiner's Communication of 5 June 2009, the claim set now matches the previously allowed claim set with strike-through and underlining, including Examiner Amendments. By way of explanation, the RCE is mainly for consideration of IDS references. The claims, other than 57, were intended to remain unchanged as allowed. Since the earlier strike-through and underlining amendments were made prior to the RCE in the allowed claims, it was believed that the claim set submitted in April as a preliminary amendment should reflect the amendments already made (i.e. no strike-through or underline). Regardless, the claims are now submitted as requested.

Respectfully,
